IMT WARRANTY CLAIMS - PREPARATION OF PART RETURN

Depending on the part and nature of failure, IMT may request that the failed part be returned for analysis. Credit will not be given until the failure analysis is complete and the warranty claim approved. Parts that must be returned to IMT for analysis must do so within 14 days with freight paid by the Distributor. All returned goods must include a return authorization number.

Parts returned to the factory must be properly packaged to prevent damage during shipment. Damage to a part as a result of improper handling or packing could be cause for claims disallowance of credit. When addressing the package for shipment, the following information must be on the outside of or tagged clearly to package:

1. Warranty Claim Report Authorization Number
2. Distributor or end-users return address.
3. Correct factory address.
4. Number of packages pertaining to each claim.

NOTE: Our warranty requires that all defective parts be returned to IMT freight prepaid. Items sent without claim number will not be accepted.

DAMAGE IN TRANSIT

Do not return damaged merchandise to IMT. Please follow claim procedure.

1. Loss in transit:

The merchandise in our kits or provided in our factory installations has been thoroughly inspected or carefully installed and tested before leaving our plant. However, regardless of the care taken at the factory, there is a possibility that damage may occur in shipment. For this reason, it is recommended that the unit be carefully inspected for evidence of possible damage or malfunction during the first few hours of operation. Responsibility for the safe delivery of the kit or factory installed unit was assumed by the carrier at the time of shipment. Therefore, claims for loss or damage to the contents of the kit or factory installed unit should be made upon the carrier.

2. Concealed loss or damage:

Concealed loss or damage means loss or damage which does not become apparent until the kit is unpacked or the factory installed unit is run by the end-user. The contents of the kit or factory installed unit may be damaged due to rough handling while in route to its destination, even though the kit or factory installed unit shows no external damage. When the damage is discovered upon unpacking, make a written request for inspection by the carrier agent within fifteen days of delivery date. Then file a claim with the carrier since such damage is the carrier's responsibility.
